OBJECTIVES

Third-year Biomedical Engineering (Honours) student at the University of Technology Sydney with one year of laboratory experience in medical device verification and validation (V&V), packaging testing, quality assurance, and GMP cleanroom operations. Strong analytical and technical reporting skills with a keen interest in pharmacist and laboratory.

ENGINEERING EXPERIENCE

Engineering Intern

Sabre Medical Pty Ltd

Oct 2024 – Sep 2025

- Worked within an **ISO Class 7 GMP cleanroom**, maintaining accurate laboratory documentation, test traceability, and collaborating with engineering and manufacturing teams.
 - Medical device **Verification & Validation (V&V)** activities, including packaging validation, accelerated ageing studies, functional testing, transportation simulation, and sterility validation in accordance with **ISO** and **ASTM** standards.
 - Executed validation protocols and prepared technical reports for packaging and accelerated ageing projects.
 - Performed sterile barrier integrity testing, including **ASTM F88 Peel**, **ASTM F2096 Bubble Leak**, and **ASTM F1929/F3039 Dye Penetration** testing.
 - Supported pouch sealing validation through **Operational Qualification (OQ)** and **Performance Qualification (PQ)**.
 - Conducted post-ageing functional verification of medical devices and quality control inspections to ensure compliance with quality standards.
-

EDUCATION

Bachelor of Engineering (Honours) (Biomedical Engineering)

University of Technology Sydney (UTS)

Expected Graduation: Autumn 2028

WAM: Credit 70.1

Relevant coursework: Medical Devices & Diagnostics, Biomedical Industry Frameworks, Advanced Biomedical Engineering Studio, Cell Biology & Genetics, Chemistry, Data Analytics, Engineering Project Appraisal, Professional Engineering Communication

Biomedical Engineering Projects

University of Technology Sydney

Biomedical Scaffold Testing

- Designed and evaluated scaffold prototypes through density, hardness, and compression testing; analysed results in Excel and presented findings in technical reports.

Biomedical Research Project

- Investigated nanoparticle detection of prostate cancer cells using fluorescence microscopy (Fiji/ImageJ) and statistical analysis (t-tests), maintaining accurate laboratory records.
-

TECHNICAL SKILLS

Laboratory: Verification & Validation (V&V), Packaging Validation, Accelerated Ageing, Transportation Simulation, Sterile Barrier Integrity Testing (ASTM F88, F2096, F1929/F3039), Mechanical Materials Testing, Compression Testing, Experimental Design, Quality Assurance, GMP, Laboratory Documentation, Technical Report Writing

Software: Microsoft Excel, Word, PowerPoint, Fiji (ImageJ), Tinkercad, Basic Java, Basic C

ADDITIONAL INFORMATION

- Fluent in English, Vietnamese, Mandarin and Cantonese
